## Peer-to-Peer Systems and Applications (Lecture Notes in Computer Science / Information Systems and Applications, incl. Internet/Web, and HCI)

Starting with Napster and Gnutella, peer-to-peer systems became an integrated part of the Internet fabric attracting millions of users. According to recent evaluations, peer-to-peer traffic now exceeds Web traffic, once the dominant traffic on the Internet. While the most popular peer-to-peer applications remain file sharing and content distribution, new applications such as Internet telephony are emerging.

Within just a few years, the huge popularity of peer-to-peer systems and the explosion of peer-to-peer research have created a large body of knowledge, but this book is the first textbook-like survey to provide an up-to-date and in-depth introduction to the field.

This state-of-the-art survey systematically draws together prerequisites from various fields, presents techniques and methodologies in a principled and coherent way, and gives a comprehensive overview on the manifold applications of the peer-to-peer paradigm. Leading researchers contributed their expert knowledge to this book, each in his/her own specific area.

Lecturers can choose from the wide range of 32 tightly integrated chapters on all current aspects of P2P systems and applications, and thus individually tailor their class syllabi. R&D professionals active in P2P will appreciate this book as a valuable source of reference and inspiration.

### **From reader reviews:**

#### **Darrell Fowler:**

The book Peer-to-Peer Systems and Applications (Lecture Notes in Computer Science / Information Systems and Applications, incl. Internet/Web, and HCI) can give more knowledge and also the precise product information about everything you want. So just why must we leave a very important thing like a book Peer-to-Peer Systems and Applications (Lecture Notes in Computer Science / Information Systems and Applications, incl. Internet/Web, and HCI)? Some of you have a different opinion about book. But one aim this book can give many facts for us. It is absolutely right. Right now, try to closer along with your book. Knowledge or info that you take for that, you may give for each other; you may share all of these. Book Peer-to-Peer Systems and Applications (Lecture Notes in Computer Science / Information Systems and Applications, incl. Internet/Web, and HCI) has simple shape but the truth is know: it has great and big function for you. You can appearance the enormous world by open and read a e-book. So it is very wonderful.

#### **Edith Ward:**

Here thing why that Peer-to-Peer Systems and Applications (Lecture Notes in Computer Science / Information Systems and Applications, incl. Internet/Web, and HCI) are different and dependable to be yours. First of all looking at a book is good but it depends in the content of it which is the content is as delightful as food or not. Peer-to-Peer Systems and Applications (Lecture Notes in Computer Science / Information Systems and Applications, incl. Internet/Web, and HCI) giving you information deeper and different ways, you can find any reserve out there but there is no publication that similar with Peer-to-Peer Systems and Applications (Lecture Notes in Computer Science / Information Systems and Applications, incl. Internet/Web, and HCI). It gives you thrill looking at journey, its open up your personal eyes about the thing which happened in the world which is probably can be happened around you. It is easy to bring everywhere like in area, café, or even in your means home by train. In case you are having difficulties in bringing the imprinted book maybe the form of Peer-to-Peer Systems and Applications (Lecture Notes in Computer Science / Information Systems and Applications, incl. Internet/Web, and HCI) in e-book can be your substitute.

#### **Pearl Norris:**

Hey guys, do you would like to finds a new book to see? May be the book with the headline Peer-to-Peer Systems and Applications (Lecture Notes in Computer Science / Information Systems and Applications, incl. Internet/Web, and HCI) suitable to you? The actual book was written by popular writer in this era. Typically the book untitled Peer-to-Peer Systems and Applications (Lecture Notes in Computer Science / Information Systems and Applications, incl. Internet/Web, and HCI) is a single of several books that will everyone read now. This kind of book was inspired a number of people in the world. When you read this book you will enter the new dimensions that you ever know previous to. The author explained their strategy in the simple way, thus all of people can easily to recognise the core of this publication. This book will give you a wide range of information about this world now. To help you see the represented of the world in this particular book.

**Nancy Harris:**

Reading a guide tends to be new life style on this era globalization. With studying you can get a lot of information which will give you benefit in your life. Having book everyone in this world can easily share their idea. Books can also inspire a lot of people. A lot of author can inspire their own reader with their story or perhaps their experience. Not only the storyline that share in the publications. But also they write about the knowledge about something that you need instance. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors in this world always try to improve their skill in writing, they also doing some study before they write for their book. One of them is this Peer-to-Peer Systems and Applications (Lecture Notes in Computer Science / Information Systems and Applications, incl. Internet/Web, and HCI).
