Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering)

Sunggyu Lee, Y.T. Shah

The newest addition to the *Green Chemistry and Chemical Engineering* series from CRC Press, **Biofuels and Bioenergy: Processes and Technologies** provides a succinct but in-depth introduction to methods of development and use of biofuels and bioenergy. The book illustrates their great appeal as tools for solving the economic and environmental challenges associated with achieving energy sustainability and independence through the use of clean, renewable alternative energy. Taking a process engineering approach rooted in the fuel and petrochemical fields, this book masterfully integrates coverage of current conventional processes and emerging techniques.

Topics covered include:

- Characterization and analysis of biofuels
- Process economics
- Chemistry of process conversion
- Process engineering and design and associated environmental technologies
- Energy balances and efficiencies
- Reactor designs and process configurations
- Energy materials and process equipment
- Integration with other conventional fossil fuel processes
- Byproduct utilization
- Governmental regulations and policies and global trends

After an overview of the subject, the book discusses crop oils, biodiesel, and algae fuels. It examines ethanol from corn and from lignocelluloses and then explores fast pyrolysis and gasification of biomass. Discussing the future of biofuel production, it also describes the conversion of waste to biofuels, bioproducts, and bioenergy and concludes with a discussion of mixed feedstock. Written for readers with college-level backgrounds in chemistry, biology, physics, and engineering, this reference explores the science and technology involved in developing biofuels and bioenergy. It addresses the application of these and other disciplines, covering key issues of special interest to fuel process engineers, fuel scientists, and energy technologists, among others.

From reader reviews:

Mark Maney:

The book Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering) can give more knowledge and also the precise product information about everything you want. Exactly why must we leave the best thing like a book Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering)? Wide variety you have a different opinion about reserve. But one aim in which book can give many details for us. It is absolutely correct. Right now, try to closer along with your book. Knowledge or information that you take for that, it is possible to give for each other; you are able to share all of these. Book Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering) has simple shape but you know: it has great and big function for you. You can appear the enormous world by open and read a publication. So it is very wonderful.

Lula Barnes:

Now a day individuals who Living in the era where everything reachable by connect with the internet and the resources included can be true or not call for people to be aware of each info they get. How people have to be smart in receiving any information nowadays? Of course the reply is reading a book. Reading through a book can help folks out of this uncertainty Information mainly this Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering) book because this book offers you rich information and knowledge. Of course the information in this book hundred percent guarantees there is no doubt in it as you know.

Mindy Marcotte:

Nowadays reading books are more than want or need but also turn into a life style. This reading practice give you lot of advantages. The benefits you got of course the knowledge your information inside the book which improve your knowledge and information. The info you get based on what kind of book you read, if you want have more knowledge just go with schooling books but if you want feel happy read one using theme for entertaining like comic or novel. Often the Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering) is kind of guide which is giving the reader unstable experience.

Gregory Goolsby:

Reading a publication tends to be new life style with this era globalization. With studying you can get a lot of information that can give you benefit in your life. Using book everyone in this world can share their idea. Books can also inspire a lot of people. A lot of author can inspire their own reader with their story as well as their experience. Not only the story that share in the ebooks. But also they write about the data about something that you need example of this. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that you can get now. The authors nowadays always try to improve their proficiency in writing, they also doing some exploration before they write with their book. One of them is

this Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering).
