Mission, Science, and Race in South Africa: A. W. Roberts of Lovedale, 1883-1938 Keith Snedegar

This is a biographical study of Alexander William Roberts, a Free Church of Scotland missionary educator who in 1883 was posted to the Lovedale Institution at Alice, South Africa. Inspired by the night sky of the southern hemisphere, Roberts became a leading observer of variable stars and an early contributor to the theory of close interacting binary stars. He actively promoted the development of colonial scientific culture and was elected president of the South African Association for the Advancement of Science in 1913. His teaching career at Lovedale fostered a commitment to the interests of his African students and their communities. In 1920 Roberts was appointed to the South African senate to represent “native” Africans; he also served as senior member of the Native Affairs Commission. Despite his liberal instincts he acquiesced to the movement toward racial segregation as advanced in the Natives (Urban Areas) and Native Administration Acts. Roberts nonetheless militated against the erosion of the Cape non-racial franchise rights; he resigned from the Native Affairs Commission just as the all-white parliament was poised to remove Africans from the common voters’ roll. His engagement with the politics of race interfered with Roberts’s astronomical research. Although he published nearly one hundred papers in scientific journals most of his observational data remained unknown until the Boyden Observatory’s Roberts archive was digitized in 2006. His influence as a mission educator also has been little known, although among his pupils were journalist and academic D.D.T. Jabavu, the physician James Moroka, and Swazi king Sobhuza I.

We advise you for having that Mission, Science, and Race in South Africa: A. W. Roberts of Lovedale, 1883-1938 instantly.

Johnna Chapin:

Your reading sixth sense will not betray you actually, why because this Mission, Science, and Race in South Africa: A. W. Roberts of Lovedale, 1883-1938 book written by well-known writer who really knows well how to make book that may be understand by anyone who read the book. Written in good manner for you, still dripping wet every ideas and writing skill only for eliminate your own personal hunger then you still doubt Mission, Science, and Race in South Africa: A. W. Roberts of Lovedale, 1883-1938 as good book not merely by the cover but also from the content. This is one reserve that can break don't judge book by its handle, so do you still needing a different sixth sense to pick that!?! Oh come on your examining sixth sense already alerted you so why you have to listening to yet another sixth sense.

Kent Dennis:

As a pupil exactly feel bored in order to reading. If their teacher questioned them to go to the library or make summary for some e-book, they are complained. Just tiny students that has reading's internal or real their hobby. They just do what the professor want, like asked to go to the library. They go to presently there but

nothing reading significantly. Any students feel that studying is not important, boring along with can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So , this Mission, Science, and Race in South Africa: A. W. Roberts of Lovedale, 1883-1938 can make you feel more interested to read.
