## **Robustness in Automatic Speech Recognition: Fundamentals and Applications (The Springer International Series in Engineering and Computer Science)** Jean-Claude Junqua, Jean-Paul Haton

Foreword Looking back the past 30 years, we have seen steady progress made in the area of speech science and technology. I still remember the excitement in the late seventies when Texas Instruments came up with a toy named "Speak-and-Spell" which was based on a VLSI chip containing the state-of-the-art linear prediction synthesizer. This caused a speech technology fever among the electronics industry. Particularly, applications of automatic speech recognition were rigorously attempted by many companies, some of which were start-ups founded just for this purpose. Unfortunately, it did not take long before they realized that automatic speech recognition technology was not mature enough to satisfy the need of customers. The fever gradually faded away. In the meantime, constant efforts have been made by many researchers and engineers to improve the automatic speech recognition technology. Hardware capabilities have advanced impressively since that time. In the past few years, we have been witnessing and experiencing the advent of the "Information Revolution." What might be called the second surge of interest to commercialize speech technology as a natural interface for man-machine communication began in much better shape than the first one. With computers much more powerful and faster, many applications look realistic this time. However, there are still tremendous practical issues to be overcome in order for speech to be truly the most natural interface between humans and machines.

**From reader reviews:**

**Janice Nolan:**

This Robustness in Automatic Speech Recognition: Fundamentals and Applications (The Springer International Series in Engineering and Computer Science) book is not really ordinary book, you have after that it the world is in your hands. The benefit you get by reading this book is definitely information inside this guide incredible fresh, you will get information which is getting deeper you read a lot of information you will get. This specific Robustness in Automatic Speech Recognition: Fundamentals and Applications (The Springer International Series in Engineering and Computer Science) without we realize teach the one who reading through it become critical in considering and analyzing. Don't always be worry Robustness in Automatic Speech Recognition: Fundamentals and Applications (The Springer International Series in Engineering and Computer Science) can bring when you are and not make your carrier space or bookshelves' become full because you can have it within your lovely laptop even mobile phone. This Robustness in Automatic Speech Recognition: Fundamentals and Applications (The Springer International Series in Engineering and Computer Science) having excellent arrangement in word and layout, so you will not sense uninterested in reading.

**Joe Vizcarra:**

Reading a publication can be one of a lot of exercise that everyone in the world loves. Do you like reading book therefore. There are a lot of reasons why people love it. First reading a publication will give you a lot of new details. When you read a book you will get new information mainly because book is one of various ways to share the information or perhaps their idea. Second, looking at a book will make a person more imaginative. When you reading through a book especially fiction book the author will bring one to imagine the story how the figures do it anything. Third, you could share your knowledge to some others. When you read this Robustness in Automatic Speech Recognition: Fundamentals and Applications (The Springer International Series in Engineering and Computer Science), you are able to tells your family, friends and also soon about yours book. Your knowledge can inspire different ones, make them reading a reserve.

**Joel Barnhardt:**

Spent a free time and energy to be fun activity to accomplish! A lot of people spent their spare time with their family, or their friends. Usually they doing activity like watching television, planning to beach, or picnic from the park. They actually doing ditto every week. Do you feel it? Would you like to something different to fill your free time/ holiday? Could possibly be reading a book can be option to fill your free of charge time/ holiday. The first thing that you'll ask may be what kinds of publication that you should read. If you want to test look for book, may be the publication untitled Robustness in Automatic Speech Recognition: Fundamentals and Applications (The Springer International Series in Engineering and Computer Science) can be great book to read. May be it can be best activity to you.

**Sophia Morrison:**

A lot of guide has printed but it is different. You can get it by world wide web on social media. You can choose the top book for you, science, amusing, novel, or whatever by simply searching from it. It is referred to as of book Robustness in Automatic Speech Recognition: Fundamentals and Applications (The Springer International Series in Engineering and Computer Science). You can add your knowledge by it. Without leaving behind the printed book, it could possibly add your knowledge and make an individual happier to read. It is most significant that, you must aware about publication. It can bring you from one spot to other place.
