Visualizing Data: Exploring and Explaining Data with the Processing Environment Ben Fry

Enormous quantities of data go unused or underused today, simply because people can't visualize the quantities and relationships in it. Using a downloadable programming environment developed by the author, *Visualizing Data* demonstrates methods for representing data accurately on the Web and elsewhere, complete with user interaction, animation, and more.

How do the 3.1 billion A, C, G and T letters of the human genome compare to those of a chimp or a mouse? What do the paths that millions of visitors take through a web site look like? With *Visualizing Data*, you learn how to answer complex questions like these with thoroughly interactive displays. We're not talking about cookie-cutter charts and graphs. This book teaches you how to design entire interfaces around large, complex data sets with the help of a powerful new design and prototyping tool called "Processing".

Used by many researchers and companies to convey specific data in a clear and understandable manner, the Processing beta is available free. With this tool and *Visualizing Data* as a guide, you'll learn basic visualization principles, how to choose the right kind of display for your purposes, and how to provide interactive features that will bring users to your site over and over. This book teaches you:

- The seven stages of visualizing data -- acquire, parse, filter, mine, represent, refine, and interact
- How all data problems begin with a question and end with a narrative construct that provides a clear answer without extraneous details
- Several example projects with the code to make them work
- Positive and negative points of each representation discussed. The focus is on customization so that each one best suits what you want to convey about your data set

The book does not provide ready-made "visualizations" that can be plugged into any data set. Instead, with chapters divided by types of data rather than types of display, you'll learn how each visualization conveys the unique properties of the data it represents -- why the data was collected, what's interesting about it, and what stories it can tell. *Visualizing Data* teaches you how to answer questions, not simply display information.

From reader reviews:

Elizabeth Frizzell:

Do you have favorite book? Should you have, what is your favorite's book? Publication is very important thing for us to be aware of everything in the world. Each reserve has different aim or perhaps goal; it means that publication has different type. Some people really feel enjoy to spend their time to read a book. These are reading whatever they acquire because their hobby is reading a book. Consider the person who don't like looking at a book? Sometime, person feel need book if they found difficult problem or maybe exercise. Well, probably you will need this Visualizing Data: Exploring and Explaining Data with the Processing Environment.

Frederick Avelar:

People live in this new day time of lifestyle always attempt to and must have the time or they will get lots of stress from both way of life and work. So , if we ask do people have time, we will say absolutely yes. People is human not a robot. Then we question again, what kind of activity have you got when the spare time coming to you actually of course your answer will certainly unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative within spending your spare time, the particular book you have read is usually Visualizing Data: Exploring and Explaining Data with the Processing Environment.

Leticia Bennet:

Do you have something that you want such as book? The book lovers usually prefer to choose book like comic, limited story and the biggest the first is novel. Now, why not trying Visualizing Data: Exploring and Explaining Data with the Processing Environment that give your pleasure preference will be satisfied through reading this book. Reading addiction all over the world can be said as the method for people to know world considerably better then how they react when it comes to the world. It can't be said constantly that reading routine only for the geeky person but for all of you who wants to always be success person. So , for every you who want to start reading as your good habit, it is possible to pick Visualizing Data: Exploring and Explaining Data with the Processing Environment become your personal starter.

Robert Clark:

You will get this Visualizing Data: Exploring and Explaining Data with the Processing Environment by visit the bookstore or Mall. Just simply viewing or reviewing it may to be your solve trouble if you get difficulties to your knowledge. Kinds of this publication are various. Not only by simply written or printed but additionally can you enjoy this book by simply e-book. In the modern era similar to now, you just looking because of your mobile phone and searching what your problem. Right now, choose your own ways to get more information about your book. It is most important to arrange you to ultimately make your knowledge are still revise. Let's try to choose correct ways for you.
