Alchemy Tried in the Fire: Starkey, Boyle, and the Fate of Helmontian Chymistry William R. Newman, Lawrence M. Principe

Winner of the 2005 Pfizer Prize from the History of Science Society.

What actually took place in the private laboratory of a mid-seventeenth century alchemist? How did he direct his quest after the secrets of Nature? What instruments and theoretical principles did he employ?

Using, as their guide, the previously misunderstood interactions between Robert Boyle, widely known as "the father of chemistry," and George Starkey, an alchemist and the most prominent American scientific writer before Benjamin Franklin as their guide, Newman and Principe reveal the hitherto hidden laboratory operations of a famous alchemist and argue that many of the principles and practices characteristic of modern chemistry derive from alchemy. By analyzing Starkey's extraordinary laboratory notebooks, the authors show how this American "chymist" translated the wildly figurative writings of traditional alchemy into quantitative, carefully reasoned laboratory practice—and then encoded his own work in allegorical, secretive treatises under the name of Eirenaeus Philalethes. The intriguing "mystic" Joan Baptista Van Helmont—a favorite of Starkey, Boyle, and even of Lavoisier—emerges from this study as a surprisingly central figure in seventeenth-century "chymistry." A common emphasis on quantification, material production, and analysis/synthesis, the authors argue, illustrates a continuity of goals and practices from late medieval alchemy down to and beyond the Chemical Revolution.

For anyone who wants to understand how alchemy was actually practiced during the Scientific Revolution and what it contributed to the development of modern chemistry, *Alchemy Tried in the Fire* will be a veritable philosopher's stone.

James Henderson:

Playing with family in a very park, coming to see the marine world or hanging out with good friends is thing that usually you may have done when you have spare time, in that case why you don't try issue that really opposite from that. 1 activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love Alchemy Tried in the Fire: Starkey, Boyle, and the Fate of Helmontian Chymistry, you could enjoy both. It is very good combination right, you still would like to miss it? What kind of hang type is it? Oh occur its mind hangout folks. What? Still don't buy it, oh come on its identified as reading friends.

Delilah Jordan:

As a university student exactly feel bored for you to reading. If their teacher requested them to go to the library in order to make summary for some publication, they are complained. Just little students that has reading's internal or real their interest. They just do what the professor want, like asked to go to the library. They go to at this time there but nothing reading seriously. Any students feel that examining is not important, boring and can't see colorful photos on there. Yeah, it is being complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore , this Alchemy Tried in the Fire: Starkey, Boyle, and the Fate of Helmontian Chymistry can make you truly feel more interested to read.
