# Teaching Children Science: A Discovery Approach (with MyEducationLab) (7th Edition)

Joseph A. Abruscato, Don A. DeRosa

**Teaching Children Science: A Discovery Approach (with MyEducationLab) (7th Edition)** Joseph A. Abruscato, Don A. DeRosa

Science is a quest for explanations. This popular text continues to encourage teachers to help their students learn through discovery, while also providing content on the latest techniques in science teaching. This edition has been thoroughly revised and features a new co-author, Dr. Donald DeRosa of Boston University and a larger trim size and paperback binding for a fresher, more open feel.

The book continues to use its well-regarded pedagogy to help students to learn science. They are:

- **A Look Ahead**—topics to be discussed in the chapter
- **Make the Case**—A reflective exercise that can be done individually or as a group.
- **Summary**—A review of the main ideas in the chapter.
- **Going Further**—Learning activities for further study
- **Resources for Discovery Learning**—A listing of websites, books, and articles for further reference.

This establishes a solid foundation in science pedagogy upon which they can build in later years.

The 5 E's of Learning and Universal Design for Learning have been added to this edition and every chapter correlates to the NSE Content Standards. A new chapter on using technology in the classroom continues to build on the authors' belief that technology can enhance learning in the science classroom. The new package includes links to video and web resources on the MyEducationLab website.

## **New To This Edition:**

**NEW! Features a new co-author in this edition**—Dr. Donald DeRosa of Boston University.

**NEW! A new paperback binding and larger 8 ½" x 11" trim size gives the book a fresher and more open feel.**

**NEW! Includes a new chapter (Chapter 8) *Using Technology to Enhance Science Learning*.**

**NEW! Gives an increased focus on technology/multimedia, engineering, and energy conservation**—Includes a new Part IV on The Technological Sciences and more earth-friendly and “green” science activities in this edition.

**NEW! Fully integrated package**--Each chapter correlates to video and web resources within the MyEducationLab website.

- The MyLab series from Pearson offers innovative homework, student assessment, and multimedia instructional tools designed to enrich the learning experience and improve course outcomes. With detailed gradebook and customization options, instructors can easily monitor student progress and save valuable time.

**NEW! Includes *The 5 E's Learning Cycle***--The 5 E's learning cycle is an instructional design model that presents a framework for constructivist learning theories that can be effectively used in teaching science.

- **Engage**--The task is introduced. Using connections to past learning, demonstrations of an event, and asking pointed questions, the teacher can spark the students' interest right away.
- **Explore**—While the teacher facilitates, students take part in hands-on activities that allow them to work with materials. Questioning, sharing and communication with other learners should be encouraged during this stage.
- **Explain**—Here the focus is on analysis. Students are encouraged to put observations, questions, hypotheses, and experiences into language. Communication between students and groups will aid student learning. Again, the teacher is the facilitator, leading discussions, asking questions, giving definitions, of helping students find the right words to describe their experiences.
- **Elaborate/Extend**--Now students should be encouraged build and expand upon what they have learned so far, making deductions and inferences. They can apply what they have learned to real world situations.
- **Evaluate**--Evaluation should be ongoing and should occur at all stages, in order to determine that learning objectives have been met. The teacher can use any assessment tool that they deem appropriate. At this time the teacher should encourage further study that builds upon what has been learned.

**NEW! *Universal Design for Learning* will be incorporated in Chapter 9 *Adapting the Science***

**Curriculum**-- Universal design is an approach to designing course instruction, materials, and content to benefit students of all learning styles.

- Universal design provides equal access to learning, not simply equal access to information. This design model allows the student to control the method of accessing information while the teacher monitors the learning process and initiates any beneficial methods. Although this design enables the student to be self-sufficient, the teacher is still responsible for imparting knowledge and facilitating the learning process. The classroom becomes a positive learning experience for all students while minimizing the appearance that special accommodations are being made for any individual student.

**NEW! Reorganizes Parts II through IV to be more reader-friendly**--The “A” and “B” subchapters of the previous edition will be broken out into content chapters and activities chapters.

**NEW!** Teaches novice instructors how to differentiate among good and bad science kits and how to utilize them effectively in the classroom.

### **From reader reviews:**

#### **Jeremy Brown:**

The book Teaching Children Science: A Discovery Approach (with MyEducationLab) (7th Edition) can give more knowledge and information about everything you want. So just why must we leave a very important thing like a book Teaching Children Science: A Discovery Approach (with MyEducationLab) (7th Edition)? A few of you have a different opinion about publication. But one aim in which book can give many info for us. It is absolutely suitable. Right now, try to closer together with your book. Knowledge or information that you take for that, you could give for each other; it is possible to share all of these. Book Teaching Children Science: A Discovery Approach (with MyEducationLab) (7th Edition) has simple shape but the truth is know: it has great and large function for you. You can look the enormous world by start and read a guide. So it is very wonderful.

#### **Jennifer Galaviz:**

Are you kind of busy person, only have 10 as well as 15 minute in your time to upgrading your mind ability or thinking skill perhaps analytical thinking? Then you are having problem with the book as compared to can satisfy your short period of time to read it because all of this time you only find e-book that need more time to be go through. Teaching Children Science: A Discovery Approach (with MyEducationLab) (7th Edition) can be your answer since it can be read by anyone who have those short time problems.

#### **Samuel Gorman:**

Many people spending their time frame by playing outside with friends, fun activity along with family or just watching TV the entire day. You can have new activity to invest your whole day by studying a book. Ugh, think reading a book can really hard because you have to accept the book everywhere? It ok you can have the e-book, taking everywhere you want in your Mobile phone. Like Teaching Children Science: A Discovery Approach (with MyEducationLab) (7th Edition) which is having the e-book version. So , why not try out this book? Let's notice.

#### **Gary Forsyth:**

A number of people said that they feel fed up when they reading a e-book. They are directly felt the item when they get a half regions of the book. You can choose the book Teaching Children Science: A Discovery Approach (with MyEducationLab) (7th Edition) to make your own personal reading is interesting. Your personal skill of reading talent is developing when you similar to reading. Try to choose easy book to make you enjoy to learn it and mingle the idea about book and reading through especially. It is to be initially opinion for you to like to available a book and examine it. Beside that the publication Teaching Children Science: A Discovery Approach (with MyEducationLab) (7th Edition) can to be your friend when you're truly feel alone and confuse with the information must you're doing of the time.
