Wiki at War: Conflict in a Socially Networked World James Jay Carafano

In 2011, amid the popular uprising against Egyptian president Hosni Mubarak, the government sought in vain to shut down the Internet-based social networks of its people.

WikiLeaks editor-in-chief Julian Assange has been branded “public enemy number one” by some in the United States for posting material on the World Wide Web that concerns airstrikes in Iraq, US diplomatic communications, and other sensitive matters.

In *Wiki at War*, James Jay Carafano explains why these and other Internet-born initiatives matter and how they are likely to affect the future face of war, diplomacy, and domestic politics.

“The war for winning dominance over social networks and using that dominance to advantage is already underway,” Carafano writes in this extremely timely analysis of the techno-future of information and the impact of social networking via the Internet. Drawing on his extensive knowledge of history and defense strategy, Carafano creates a cogent analysis of what is truly new about the “new media,” and what is simply a recasting of human warfare in contemporary forms.

Wiki at War is written in a lively, accessible style that will make this technological development comprehensible and engaging for general readers without sacrificing the book’s usefulness to specialists. Outlining the conditions under which a difference in degree becomes a difference in kind, detailing how ancient wisdom can still apply to national security decisions, and examining the conditions under which new expertise is required to wage effective diplomacy or successful military strategy, Carafano casts in stark relief the issues that face political, military, and social leaders in trying to manage and control information, in both the international and domestic arenas. *Wiki at War* affords stimulating thought about and definitive discussion of this vital emerging topic.

Santos Conrad:

People live in this new day time of lifestyle always try to and must have the free time or they will get large amount of stress from both way of life and work. So , whenever we ask do people have free time, we will say absolutely yes. People is human not only a robot. Then we ask again, what kind of activity do you possess when the spare time coming to an individual of course your answer will unlimited right. Then ever try this one, reading textbooks. It can be your alternative throughout spending your spare time, the book you have read is definitely Wiki at War: Conflict in a Socially Networked World.

Mary Jacobs:

As a scholar exactly feel bored in order to reading. If their teacher expected them to go to the library or even make summary for some reserve, they are complained. Just minor students that has reading's heart or real their interest. They just do what the instructor want, like asked to the library. They go to generally there but nothing reading very seriously. Any students feel that examining is not important, boring as well as can't see colorful pictures on there. Yeah, it is being complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this Wiki at War: Conflict in a Socially Networked World can make you truly feel more interested to read.
