**A Treatise on Electricity and Magnetism (Cambridge Library Collection - Physical Sciences)** James Clerk Maxwell

Arguably the most influential nineteenth-century scientist for twentieth-century physics, James Clerk Maxwell (1831-1879) demonstrated that electricity, magnetism and light are all manifestations of the same phenomenon: the electromagnetic field. A fellow of Trinity College Cambridge, Maxwell became, in 1871, the first Cavendish Professor of Physics at Cambridge. His famous equations - a set of four partial differential equations that relate the electric and magnetic fields to their sources, charge density and current density - first appeared in fully developed form in his 1873 *Treatise on Electricity and Magnetism*. This two-volume textbook brought together all the experimental and theoretical advances in the field of electricity and magnetism known at the time, and provided a methodical and graduated introduction to electromagnetism. Volume 1 covers the first elements of Maxwell's electromagnetic theory: electrostatics, and electrokinematics, including detailed analyses of electrolysis, conduction in three dimensions, and conduction through heterogeneous media.

### **From reader reviews:**

#### **Frances Carlton:**

The book A Treatise on Electricity and Magnetism (Cambridge Library Collection - Physical Sciences) can give more knowledge and information about everything you want. Why must we leave a very important thing like a book A Treatise on Electricity and Magnetism (Cambridge Library Collection - Physical Sciences)? A few of you have a different opinion about book. But one aim this book can give many details for us. It is absolutely appropriate. Right now, try to closer together with your book. Knowledge or info that you take for that, it is possible to give for each other; you may share all of these. Book A Treatise on Electricity and Magnetism (Cambridge Library Collection - Physical Sciences) has simple shape however you know: it has great and massive function for you. You can appearance the enormous world by wide open and read a guide. So it is very wonderful.

#### **Elinor Russell:**

Information is provisions for anyone to get better life, information nowadays can get by anyone on everywhere. The information can be a understanding or any news even a concern.
