Direct To Brain Windows: The History of Neuron Reading and Writing Ted Huntington

If you have to read this book, then you do not get Direct-to-Brain Windows! The first ever tell-all book about Direct-to-Brain Windows. Do you see little semi-transparent windows and videos in front of your eyes? No?! Then you are excluded too! It sounds crazy, but getting video directly to our eyes and ears removes the need to look at a screen or to wear headphones, and is just as safe and harmless. Ted Huntington breaks the silence for the first time in history by telling the public openly and explicitly many secret details about Direct-to-Brain Windows, remote neuron reading, writing, and muscle moving. But perhaps even more importantly, Huntington reveals the truth about many "science" lies, frauds, secrets and mistaken beliefs. It's shocking, vicious, and beyond belief, to realize that many millions secretly see inside houses and heads in windows in front of their eyes, but for centuries, have denied that same benefit to millions of other fine people - not even telling them that such a thing happened long ago in the past. But it's all there, clearly spelled out by many heroic thinkers through the many dark centuries of silence and violence.
