End-to-End Adaptive Congestion Control in TCP/IP Networks (Automation and Control Engineering)

Christos N. Houmkozlis, George A. Rovithakis

End-to-End Adaptive Congestion Control in TCP/IP Networks (Automation and Control Engineering)

Christos N. Houmkozlis, George A. Rovithakis

End-to-End Adaptive Congestion Control in TCP/IP Networks (Automation and Control Engineering)
Christos N. Houmkozlis, George A. Rovithakis

This book provides an adaptive control theory perspective on designing congestion controls for packet-switching networks. Relevant to a wide range of disciplines and industries, including the music industry, computers, image trading, and virtual groups, the text extensively discusses source-oriented, or end-to-end, congestion control algorithms. The book empowers readers with clear understanding of the characteristics of packet-switching networks and their effects on system stability and performance. It provides schemes capable of controlling congestion and fairness and presents real-world applications to demonstrate the modeling and control techniques.

From reader reviews:

Tiara Arnold:

The particular book End-to-End Adaptive Congestion Control in TCP/IP Networks (Automation and Control Engineering) has a lot associated with on it. So when you check out this book you can get a lot of advantage. The book was published by the very famous author. This articles author makes some research ahead of write this book. This book very easy to read you can find the point easily after looking over this book.

Patricia Thomas:

Do you really one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Try to pick one book that you never know the inside because don't assess book by its cover may doesn't work is difficult job because you are afraid that the inside maybe not as fantastic as in the outside look likes. Maybe you answer may be End-to-End Adaptive Congestion Control in TCP/IP Networks (Automation and Control Engineering) why because the wonderful cover that make you consider concerning the content will not disappoint you actually. The inside or content is actually fantastic as the outside or perhaps cover. Your reading 6th sense will directly direct you to pick up this book.

Olga Andres:

You may get this End-to-End Adaptive Congestion Control in TCP/IP Networks (Automation and Control Engineering) by go to the bookstore or Mall. Merely viewing or reviewing it might to be your solve difficulty if you get difficulties for ones knowledge. Kinds of this book are various. Not only simply by written or printed but additionally can you enjoy this book by means of e-book. In the modern era just like now, you just looking of your mobile phone and searching what their problem. Right now, choose your current ways to get more information about your guide. It is most important to arrange you to ultimately make your knowledge are still change. Let's try to choose correct ways for you.

Bennie Gale:

E-book is one of source of knowledge. We can add our knowledge from it. Not only for students but in addition native or citizen require book to know the revise information of year to help year. As we know those guides have many advantages. Beside we add our knowledge, could also bring us to around the world. From the book End-to-End Adaptive Congestion Control in TCP/IP Networks (Automation and Control Engineering) we can consider more advantage. Don't you to definitely be creative people? Being creative person must like to read a book. Only choose the best book that suited with your aim. Don't possibly be doubt to change your life at this book End-to-End Adaptive Congestion Control in TCP/IP Networks (Automation and Control Engineering). You can more attractive than now.
