Walter A. Triebel, Avtar Singh

## The 8088 and 8086 Microprocessors: Programming, Interfacing, Software, Hardware, and Applications (4th Edition) Walter A. Triebel, Avtar Singh

Designers of microprocessor-based electronic equipment need a *systems-level* understanding of the 80x86 microcomputer. This volume offers thorough, balanced, and practical coverage of both software and hardware topics. Develops basic concepts using the 8088 and 8086 microprocessors, but the 32-bit version of the 80x86 family is also discussed. Examines how to assemble, run, and debug programs, and how to build, test, and troubleshoot interface circuits. Provides detailed coverage of floating-point processing and the single instruction multiple data (SIMD) processing capability of the advanced Pentium processor. Includes added material on number systems, logic functions and operations, conversion between number systems, and addition/subtraction of binary numbers. Includes new advanced material such as floating Point Architecture and Instructions, Multimedia (MMX) Architecture and Instructions, and the hardware and hardware architecture of the Pentium 3 and Pentium 4 processors. Covers the Intel architecture microprocessor families: 8088, 8086, 80286, 80386, 80486, and the latest Pentium® processors. Illustrates commands of the DEBUG program and how to assemble, disassemble, load, save, execute, and debug programs on the IBM PC. Introduces the contents of the 8088's instruction set. Explores practical implementation techniques, covering the use of latches, transceivers, buffers, and programmable logic devices in the memory and I/O interfaces of the microcomputer system. A valuable handbook for self-study in learning microprocessors, for electrical engineers, electronic technicians, and all computer programmers.

**From reader reviews:**

**Tommy Heckman:**

Have you spare time for just a day? What do you do when you have a lot more or little spare time? Yeah, you can choose the suitable activity with regard to spend your time. Any person spent their very own spare time to take a move, shopping, or went to the particular Mall. How about open or maybe read a book allowed The 8088 and 8086 Microprocessors: Programming, Interfacing, Software, Hardware, and Applications (4th Edition)? Maybe it is being best activity for you. You know beside you can spend your time along with your favorite's book, you can cleverer than before. Do you agree with it has the opinion or you have different opinion?

**Tamela Campbell:**

What do you with regards to book? It is not important with you? Or just adding material when you need something to explain what yours problem? How about your spare time? Or are you busy man or woman? If you don't have spare time to perform others business, it is make you feel bored faster. And you have extra time? What did you do? Everybody has many questions above. They need to answer that question mainly because just their can do which. It said that about e-book. Book is familiar in each person. Yes, it is suitable. Because start from on kindergarten until university need that The 8088 and 8086 Microprocessors: Programming, Interfacing, Software, Hardware, and Applications (4th Edition) to read.

**Thomas Towne:**

A lot of people always spent their very own free time to vacation as well as go to the outside with them friends and family or their friend. Are you aware? Many a lot of people spent many people free time just watching TV, as well as playing video games all day long. If you want to try to find a new activity that's look different you can read the book. It is really fun for yourself. If you enjoy the book which you read you can spent all day long to reading a book. The book The 8088 and 8086 Microprocessors: Programming, Interfacing, Software, Hardware, and Applications (4th Edition) it is rather good to read. There are a lot of folks that recommended this book. We were holding enjoying reading this book. Should you did not have enough space to create this book you can buy the particular e-book. You can m0ore quickly to read this book out of your smart phone. The price is not very costly but this book provides high quality.

**Joyce Jiminez:**

People live in this new day time of lifestyle always aim to and must have the spare time or they will get lot of stress from both everyday life and work. So , if we ask do people have spare time, we will say absolutely sure. People is human not really a huge robot. Then we inquire again, what kind of activity are you experiencing when the spare time coming to a person of course your answer may unlimited right. Then ever try this one, reading ebooks. It can be your alternative inside spending your spare time, the particular book you have read is usually The 8088 and 8086 Microprocessors: Programming, Interfacing, Software,

Hardware, and Applications (4th Edition).
