Do the math: If a mother averages six diaper changes a day, she'll change 2,190 diapers during her baby's first year. Things improve slightly over the next twelve months. Based on five changes a day, she'll add another 1,825 diaper changes to her score. By the time her child is half-way to her third birthday, Mom will pass the 5,000 mark. That's a lot of dirty diapers! If this mom is you, it's no wonder you might be thinking seriously about potty training.

While successful potty training in itself isn't considered a developmental milestone in a child's life, it is nonetheless an important transition for both you and your child. The good news is that potty training doesn't have to be complicated and neither does a book that explains it. Busy moms need a resource that gives them comprehensive information without a lot of unnecessary details and presents them with options instead of a one-size-fits-all program. Potty Training 1-2-3 provides all of that and more. The more is in the results.
