## Seamless Networks: Interoperating Wireless and Wireline Networks (Mcgraw-Hill Series on Telecommunications) Arkady Grinberg

There is great competition to capture market share in the global communications industry. This means that professionals will be challenged to integrate some very different technologies - wireline, cellular and PCS among them. This text offers practical guidance on achieving smooth merges of all current network technologies. Covering product development standards, connectivity, performance and service and strategic planning, this book provides a one-step resource to making it all work together.
