This generously illustrated, user-friendly atlas for both cytopathologists and surgical pathologists is a practical guide to the diagnostically challenging area of cervical cytopathology. Not only does the *Atlas* feature concise, expert descriptions of the full range of cytopathologies in the gynecological tract, it also presents and contrasts problematic pathologies that can potentially lead to erroneous interpretation. Over 500 carefully chosen, high-resolution color images illustrate crucial aspects of gynecologic tract disease, and selected images of the histopathologic and gross characteristics of the lesions enable morphologic correlation. Additionally, the book features a special chapter authored by a gynecological expert on the colposcopic characteristics of cervical lesions, along with a brief review of the updated ASCCP management guidelines emphasizing a multidisciplinary approach.
