The Basics of Geomorphology: Key Concepts Kenneth J. Gregory, John Lewin

"I can think of no better guides than Professors Ken Gregory and John Lewin to lead the reader through the conceptual basis of this exciting science."

- **Victor R. Baker, University of Arizona**

"A very readable and informative introduction to the discipline for senior undergraduates, postgraduates and researchers."

- **Angela Gurnell, Queen Mary University of London**

"Time will tell, but this book may well mark a turning point in the way students and scientists alike perceive Earth surface processes and landforms."

- **Jonathan Phillips, University of Kentucky**

This student focused book provides a detailed description and analysis of the key concepts, ideas, and hypotheses that inform geomorphology.

Kenneth Gregory and John Lewin explain the basics of landform science in 20 concepts, each the subject of a substantive, cross-referenced entry. They use the idea of the 'geomorphic system' to organise entries in four sections, with extensive web resources provided for each:

- **System Contexts:** The Systems Approach / Uniformitarianism / Landform / Form, Process and Materials / Equilibrium / Complexity and Non Linear Dynamical Systems
- **System Functioning:** Cycles and cascades / Force-Resistance / Geomorphic work / Process Form Models
- **System Adjustments:** Timescales / Forcings / Change Trajectories / Inheritance and Sensitivity / Anthropocene
- **Drivers for the Future:** Geomorphic Hazards / Geomorphic Engineering / Design and Prediction

Aligned with the teaching literature, this innovative text provides a fully-functioning learning environment for study, revision, and even self-directed research for both undergraduate and postgraduate students of geomorphology.

From reader reviews:

Joan Cross:

The book *The Basics of Geomorphology: Key Concepts* has a lot of knowledge on it. So when you make sure to read this book you can get a lot of advantage. The book was written by the very famous author. The writer makes some research previous to write this book. This book very easy to read you can find the point easily after looking over this book.

David Henry:

This *The Basics of Geomorphology: Key Concepts* is great reserve for you because the content which is full of information for you who also always deal with world and possess to make decision every minute. That book reveal it info accurately using great organize word or we can state no rambling sentences inside it. So if you are read this hurriedly you can have whole info in it. Doesn't mean it only provides straight forward sentences but difficult core information with beautiful delivering sentences. Having *The Basics of Geomorphology: Key Concepts* in your hand like getting the world in your arm, information in it is not ridiculous a single. We can say that no publication that offer you world inside ten or fifteen minute right but this e-book already do that. So , this can be good reading book. Heya Mr. and Mrs. hectic do you still doubt in which?

Donna Wright:

The book untitled *The Basics of Geomorphology: Key Concepts* contain a lot of information on it. The writer explains the girl idea with easy approach. The language is very clear and understandable all the people, so do definitely not worry, you can easy to read that. The book was written by famous author. The author will take you in the new time of literary works. You can easily read this book because you can continue reading your smart phone, or program, so you can read the book with anywhere and anytime. In a situation you wish to purchase the e-book, you can start their official web-site and also order it. Have a nice study.

Craig Rushing:

As a student exactly feel bored to help reading. If their teacher inquired them to go to the library or make summary for some reserve, they are complained. Just little students that has reading's heart or real their leisure activity. They just do what the educator want, like asked to go to the library. They go to generally there but nothing reading seriously. Any students feel that looking at is not important, boring and can't see colorful images on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this age, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this *The Basics of Geomorphology: Key Concepts* can make you sense more interested to read.
